9. Chapter 6: Foreseeing a restructured Nigeria

10. Chapter 7: Nigerian Political Ideology

Introduction

Thank you for purchasing a copy of this book or downloading the ebook. This book aims to give unique perspectives and insights into Nigeria. Exploring the myriad opportunities in her problems.

This book is perhaps like no other you have read before, as it is one of the first books to be converted from a series of related Articles and Blog posts. The research question guiding every chapter of this book is: Will restructuring change the attitude of Nigerians to Nigeria? Metaphorically speaking: Should the cart be pulling the horse or the horse pulling the cart?

Key Subjects:

- Nigeria today, position in the world and achievements?
- Recurring underlying problems which restructuring may not solve?
- Opportunities existing in the problems including digital technology
- Foreseeing result of constructing, restructuring or destructing Nigeria from the perspective of Nigerians as interactively blogged live.

This book is the culmination of my passionate study/experience of Nigeria, the articles and intense discussions i have had with fellow Nigerians. A contribution to the existing body of work, and roadmap for generations to come. Nigeria is uniquely positioned in the world, and to whom much is given, much is expected.

Gregory Ekhaton

About The Author

Gregory Ehiwemwenze Ekhator

\

Gregory Ehiwemwenze Ekhatator, known as Greg by his friends was born on 2nd February, 1970 in the small English town of Stafford, England. He is the first child of 5 (one now late) of his parents Reuben and Magdalene

Ekhaton, who are also authors in their own right. Greg moved to Nigeria with his parents when he was 5 years old, which was the norm back then in the mid-seventies with returning Nigerian diasporans to develop the motherland.

Gregory, attended primary and secondary school in Benin City (at the time, the 4th largest city) in Nigeria. He continued his education at the University of Benin, achieving his first degree. He discovered his passion for Nigeria at University when in the company of like minded firebrands who were fed-up with corruption and mis-governance that culminated in the 1989 SAP protests that spread through out the nation and brought it to a standstill for 3 days during Babagida's military regime.

He relocated back to the UK working as a professional and acquiring all the professional skills and experience as a digital producer, elearning, ebusiness architect and publisher.

Expertise

Greg Ekhaton is also a publisher, digital marketer and training software producer. As a qualified and certified e-learning architect, he has written many articles on this subject. He is a passionate evangelist of the "Creative economy" manifesting in Nigeria; indeed for the whole of Africa as we transform our indigenous technology into data goldmines.

He has a total of 14 years in the elearning industry working with a range of clients from small SME, the educational institutions all the way to fortune 100 blue chip companies such as IBM, Vodafone and Marriot Vacation Club.

Personal

Greg loves writing, creating, and contributing to society meaningfully. When he is not working or busy with social media activism, he is relaxing with family or watching football with friends. He is also strictly non-partisan

with his politics, especially because he doesn't see Nigerian politicians operating with any ideology whatsoever apart from great affinity for

source of funding. During the last political cycle, he is known to have “ready made post replies” for his social media friends who attempted to pigeon-hole him with partisan jibes. See Chapter on Nigerian **politics** .

Blog to E-Book by Debonair Publisher (Intro)

As an ebusiness solution architect and elearning director; I have published and marketed books for a lot of clients. This typically involves the client coming up with the manuscript and the cycles of editing that usually occurs with authoring a book. However web technology is fast changing this, because with today's social media technology, the manuscripts are already written in many blogs. All that is needed is: intelligent software programs that can extract related blog entries, bunch them into articles, edit the articles into flowing chapters, and voila! You have your authored E-book that can be professionally edited, then printed into a printed paperback book.

As a Nigerian Brit i have been passionate about Nigeria, as well as Britain. So here is a book about Nigeria and Britain, from the existing Blog's, Notes and Articles i have written about both countries over the last ten years.

To make this as immersive and engaging as possible, i will be giving a running blog commentary of the production of the E-Book. This book consists of 4 parts:

1. My analysis of Nigeria's strength's and still pregnant potential, laced with some history.
2. Nigeria's seemingly intractable problems and proffered solutions.
3. Contrast of Britain versus Nigeria politics, economy and culture.
4. Lessons the British must learn from Nigeria and Nigeria from Britain to survive.

As part of the promotion of this E-Book, the top 10 contributors to Debonair

blog with entries will win a free download copy of the E-Book. Book 2

Chapter 1: Summary

Chapter 1: This is a short Summary of each chapter

chapter 2: Great Nigeria and the competing primordial forces gives a brief history of the ethnic powerplays in Nigeria

Chapter 3: Blaming the West vs taking responsibility - Details the opportunities lost by continually blaming instead of taking responsibility and moving on. In addition it has great contributions from users, similar to the situated learning discussion in Plato's Republic.

Chapter 4: Digital technology opportunities amidst Nigeria beyond crude oil, which are booming. since the last administration and more so now.

Chapter 5: World history in brief to show Nigeria's situation is not really peculiar, and as such we should get on with it.

Chapter 6: Forseeing a restructured Nigeria amidst the tribalism and disunity brouhaha. This one has an excellent speech from the current Emir of Kano, before he became Emir while at the launch of a book.

Chapter 7: Nigerian political ideology or the lack of it, and an experiment to attempt to formulate one.

Chapter 8: A riveting piece with profound socratic contributions on Nigeria's moral compass.

Continued in Book 2

Chapter 2: Great Nigeria: The competing forces, 1914 till date

5 Things you may not know about Nigeria...

In 2017, “Restructuring” is the buzz-word, with little thought for what it means or the end product.

“Acculturing” (present participle tense of Acculturation) seems what should be the buzzword. This book will detail many habits that are now woven into our culture to make "restructuring" without acculturing almost completely wasteful.

Most Nigerians will recall when they were children, being taught in school –“ the children are the leaders of tomorrow and Nigeria is a country with great potential yet to be realised.” That was a good 40 years plus ago, and it still seems true as said recently in last presidential election social media commentary.

However, taking stock, there has been some potential manifested, some manifesting right now, and plenty more yet to be manifested by us who were the children back then. Although we have now all grown up; If we dare use the axiom; We are yet to really: "Take the bull by the horn."

To paraphrase Ben Hurr, "Where are we now, where are we going, and how the are we going to get there?"

Where are we now?

Data (July 2017)

Nigeria is named for the Niger River that flows through the West of the country to the Atlantic Ocean; from a native term "Ni Gir" meaning "River Gir"

Most populous black nation on earth; meaning any cultural trend in Nigeria, has potential of affecting all of the world's black race. The infectiousness of Nollywood movies even with Caribbean and African Americans is a shining example. Nigeria is said to be the 3rd biggest movie industry in the world after Hollywood, and Bollywood.

In addition, as shown in the image, 28% of Forbes' 40 richest entrepreneurs are from Nigeria. Nigeria is through third largest English speaking nation in the world after India and USA and the 8th most populous country in the world.

Population: 190,632,261, (190.6 million Nigerian citizens)

GDP (PPP):

\$1.1 trillion

2.7% growth

4.7% 5-year compound annual growth

\$6,108 per capita

Inflation (CPI):

9.0%

FDI Inflow:

\$3.1 billion - The highest in Africa in 2013, mainly due to comparatively

large ratio of percentage of population in diaspora, remitting money

home to Nigeria. Actually after Crude oil, the next highest FOREX earner for Nigeria is FDI

This data is according to the CIA world fact book:

Ethnic groups:

Nigeria, Africa's most populous country, is composed of more than 250, some say more than 300 ethnic groups; the most populous and politically influential are: Hausa and the Fulani 29%, Yoruba 21%, Igbo (Ibo) 18%, Ijaw 10%, Kanuri 4%, Ibibio 3.5%,

Tiv 2.5%

Source: University of Texas Library

It is worthy of note that within any credible reportage of population distribution in Nigeria, there is a strong political undertone, for instance in the data here, the Hausa and Fulani are reported as one figure ie 29%, and to a large extend they can truly be reported as one figure because of their unity bonds. On the other hand the Edo and Urhobo ethnic groups (even though they are originally one ethnic group) are not represented in this ethnicity distribution, most likely because they both don't stress their unity nearly as enough as the others. If the Edo + Urhobo had a strong bond, combined, their population percentage is higher than Ibibio and almost as much as Kanuri, at 3.95 percent.

This clearly shows one of the hazards of restructuring along intangible ethnic lines, especially because the motivation for unity between ethnic groups can be readily manipulated by politicians. The perpetuation of the entitlement mentality stems mainly from this.

Languages:

English (official), Hausa, Yoruba, Igbo (Ibo), Fulani, over 500 additional indigenous languages

Religions:

Muslim 50%, Christian 40%, indigenous beliefs 10%

Age structure:

0-14 years: 42.79% (male 40,744,956/female 38,870,303)

15-24 years: 19.48% (male 18,514,466/female 17,729,351)

25-54 years: 30.65% (male 29,259,621/female 27,768,368)

55-64 years: 3.96% (male 3,595,293/female 3,769,986)

65 years and over: 3.12% (male 2,754,040/female 3,047,002) (2016 est.)

Urbanization:

urban population: 49.4% of total population (2017)

rate of urbanization: 4.3% annual rate of change (2015-20 est.)

Major urban areas - population:

Lagos 13.123 million; Kano 3.587 million; Ibadan 3.16 million; ABUJA (capital)

2.44 million; Port Harcourt 2.343 million; Benin City 1.496 million (2015)

HIV/AIDS - adult prevalence rate:

Success and solution/opportunity facts ~ Data on economic freedom
source: [http://www.heritage.org/index/...](http://www.heritage.org/index/)

As of July 2017 there are signs of growth out of the recession but not yet
completely out of it <http://www.focus-economics.com...>

Nigeria is the least overall taxed country in the world in the free
economy bracket

Nigeria has the highest freedom of labour in the
world [http://www.heritage.org/index/...](http://www.heritage.org/index/)

Nigeria is now exporting more than she is importing
goods <http://country.eiu.com/nigeria>

In football monthly world ranking: Nigeria ranks 39 in July 2017

THE ABOVE FOUR PLUS THE MOBILE TELEPHONY AND INTERNET

PROLIFERATION DEPICT A BUMPER HARVEST OF OPPORTUNITIES, FOR THOSE INVESTED IN THE LONG-TERM.

Failure and real problem/Opportunity facts

Rated 205th growth rate of -1.70 as economy contracts due to recession as well fighting corruption to recoup funds from the corrupt. <https://www.cia.gov/library/pu...>

The Corruption Perceptions Index (CPI) - Rated 136 out of 176 countries and scored 28.0

The KOF Index of Globalization measures the economic, social, and political dimensions of globalization in each country. Rated 103 out of 192 with a score 52.32

Management Index (Political Leadership Towards Democracy and a Market Economy) . Rated 93rd of 129 countries with a score 4.06

The Networked Readiness Index (NRI) - 119 out of 139 rated countries with an index of 3.15. The highest was Singapore with 6.04.

(NRI) evaluates how conducive a country is to the development of a network of information and communication technologies

<https://globaledge.msu.edu/cou...>

From the above success and failures, myriad of opportunities can be gleaned by searching entrepreneurs. All the data on Nigeria's failure, points to lack of competent manpower both in policy making and the technocrats implementing the policies. Especially the lack of capacity in industry to produce from seized opportunities in the market. A KEY component for technological development is ELECTRICITY SUPPLY. This has been a major huddle in the past, however in 2017 about 75% of Nigeria reluctantly agree there has been a little improvement in generation and distribution of electric power to them.

The I.T sector which is classified as the Service sector is still one of the fastest

growing sectors, and once Nigeria emerges from the recession , the bounce should be at least double the current performance as predicted by the Economist for 2018.

Nigeria is still referred to as potentially one of the richest countries in the

world, and for very good reason. Apart from the mentioned reasons above; the uniqueness of Nigeria, the make up, and constituent natural resources makes Nigeria potentially the envy of the world. However like most good things in this world, it comes with responsibility and failure to have this "Responsibility" translates what is a blessing to be instead a curse.

For every development and .progress made by Nigeria, she is hounded by how much more she could have accomplished if not for her intractable problems and errors that she seemingly can't or refuses to learn from them and in-turn solve them.

However, to be cautious and not to throw away the proverbial "baby with the bath-water", let us count Nigeria's blessings, progress so far, while also doing analysis of how much more Nigerians could have done and why it wasn't done then and perhaps not yet doing it now?

Which leads us to study the history of Nigeria and the primordial forces raging beneath her belly.

Linguistic Groups

A map of Nigeria divided into regions based on linguistic groups. The map includes major cities and the Niger River. The linguistic groups are color-coded and listed in a legend.

Principal Linguistic Groups:

- Chamba (Light Green)
- Edo (Dark Green)
- Efik-Ibibio (Dark Red)
- Gwari (Red)
- Hausa and Fulani (Yellow)
- Ibo (Orange)
- Ijaw (Green)
- Kanuri (Light Blue)
- Nupe (Light Green)
- Tiv (Brown)
- Yoruba (Pink)
- Mixed (Orange)

PRIMORDIAL FORCES IN NIGERIA

In Nigeria there is a figure of speech: "Where there is smoke, there is fire." Most of the intractable problems in Nigeria persist because of the backlog failure of leadership, the failure to address issues sufficiently, or to bring healing and reconciliation to aggrieved sides.

The image below shows one such aggrieved people in a protest. These are bare-chested senior citizens, women who are mothers. They will never forget this day, their children and grand children won't neither. This is just one example of a stirred primordial force, because the taboo and emotional energy lingers in the mind of any oppressed person [Nigerian oppression meaning =1], compounded by the transferrable aggression.

This is a summary of the primordial tribal forces at work in Nigeria and how the Fulani managed to maintain a power base in Nigeria. There are links for further studies throughout (directly in the e-book version).

Nigeria's ethnic make-up is comprised of: in the north Hausa's / Fulani's, who are mostly Muslims, but they are surrounded by minority northern ethnic groups (tribes) such as Kanuri in the North east, Tivs, Igalas, Junkuns, Nupes, Zango-Katafs, and Biroms in the north central.

In the south. There are the two major ethnic groups ie Yoruba and Igbo who are mainly Christian or indigenous African believers. The southerners are surrounded by many tribes such as Efik and Ibibio, Ijaw and Edo in the South south. There are many sub-tribes with their dialects in the south south too, such as Urhobo, kwale and Esan.

([Okonofua, 2011](#), [Crowder, 1978](#); [Onwubiko, 1972](#); [Sagay, 2008](#))

In Nigeria there is this term called Hausa-Fulani Hegemony, with the South

easterners incendiary allegation of the Northerners having this "Born to rule" mentality. The ancestor's of the Fulani, the Fula people originate from Sudan. Therefore all of northern Nigeria, even into south such as Ilorin and Auchi, part of Edo state, is systemically and indirectly controlled by the Fula people first through Jihad conquest and/or then subtly through religion. The ethno-religious primordial forces are intertwined because of this and the balancing of this is also what makes it delicate and political. It works out about 50% muslim, 40% Christian, 10% indigenous beliefs ([CIA World Factbook, 2010](#)).

It starts with the Fulani Jihad ([Onwubiko, 1972](#)) in 1804 with the Fula people conquering the indigenous hausa people led by Uthman Dan Fodio, with his victory over the army of Mohammed Yunfa, King of Gobir. This was followed by other Hausa states such as Katsina all the way to Kebbi and beyond. The conquest continued into non-hausa states such as Ilorin and Auchi. Adamawa (1806), Nupe (1810), Ilorin (1835), ([Onwubiko, 1972, 1982](#)).

The nomadic cattle-herding nature of the Fulani further gave them an edge in succeeding with the Jihad which was now almost complete. This was in the early 1800's and religious form of partimoniaism was the prevalent system of government at the time. The power structure was not like today with a constitution but rather power flowed from the Sultan to the appointed Muslim Ummah's and military leaders as well as appointees to lord over and control the northern masses. The power originated from the spiritual and cultural capital. Of course this was all mixed with religion and piety so the authority was near absolute at the time.

In 2017, not much has changed in the north concerning the power structure and allegiance to who the powerful hausa-fulani oligarchy appoints. One thing the Northerners do have over the Southerners is oneness in voice especially cemented by religion. [C. Wright Mills \(1956\)](#).

Theocratic power was wielded by the Sultan of Sokoto in a Caliphate and this is how he maintained control, until the British came during colonisation and amalgamation in 1914. The British found it convenient to employ

indirect rule of the northern subjects because their reward system of not interfering with religious or cultural control of the people was working fine with them, in contrast with the level of cooperation they were getting from the south especially the South easterners who were always intransigent and asking for independence. This is what the last British governor general is quoted as saying of Nigerian regional leaders:

"The northern leaders differences in ordinary custom and behavior between the dignified, polite and rather aloof northerner and the uninhibited, vociferous southerner who noisily showed his disagreement in council and parliament without good manner and restraint" ([Deng, 1996](#), p. 62).

So it can be easily surmised this was one of the chief reasons for the British favouring the Northern leadership of Nigeria over the Southern leaders. ([Crowder, 1978](#); [Okonofua, 2011](#); [Onwubiko, 1972](#)).

The British further divided the Southern region, into the Eastern and Western region, but did not do the same with the Northern region, which is clear evidence of the "divide and conquer" approach employed.

The Midwest region and other smaller ethnic minorities were encouraged and forged along systematic routes to checkmate the southerners against any hegemonic system of their own regardless of foresight and after effects of mismatching of incompatible peoples.

([Kennedy, 2007](#); [Okonofua, 2011](#)). It is for this reason that [Ijomah \(1988](#), p. 56)

As part of the divide and rule strategy, the British carved a geography of Nigeria to suit their political agenda, buttressed with a rigged election ([Omoruyi, 1999](#); [Sagay, 2008](#)).

The first census of Nigeria unfairly favoured the north with an extra 2,938,000. 3,855,00 to east, 4,641,000 to west and 11,434,000 to north. Out of a total of 19,930,000

This created the basis for the power base lopsided to the North, intrinsic in Nigeria even until date. At the 1950 national conference, the North insisted

on having half of the seats in the legislature which resulted in the British granting 34 seats to the West, 34 seats to the East and 68 seats to the North.

This was repeated in the 1952 census with the same ratio of increased population with 2,500,000 favouring the North. The West had 6,369,000, the East had 7,971,000 and the North had 16,540, from a total population of 31,540,000 at the time.

Sir James Robertson who was specially drafted in 1955 after handling a similar political dynamic in the Sudan, continued the strategy of his predecessor Governor General's ie Lord Lugard and Lord Harcourt; he strategically got Tafewa Balewa, the leader of NPC (Northern People Congress) to form a new government as the counting of votes barely started [Sagay \(2008\)](#).

According to Omoruyi (1999): Sir James Robertson was a shrewd implementer of the northern rule. He is on record as confessing that he did not handle this phase to the satisfaction of Dr Azikiwe and Chief Awolowo. Sir James confessed that he invited Balewa to form the government in 1959 by persuading some of the southern members to support him and after Sir Abubakar had assured him that he will get a southern group to work with him. Sir James did this before the results were announced. He confessed that he did this to appease the Sardauna of Sokoto, the leader of the NPC, to stop him from taking the north out of Nigeria.

~ [Omoruyi \(1999, p. 25\)](#)

The republic of Biafra was created on behalf of this Census matter and the ensuing control structure that manifests from it. that led to the eventual civil war. The first post independence census in 1963 saw the north manipulate the results similar to the way the British did, however it was vociferously challenged by the eastern region as they threatened to pull out of Nigeria.

The declaration of Biafra and the subsequent secession led to a bloody civil war between 1967 and 1970., which led to the loss of over 1 million Biafrans and many Nigerian troops as well. At the end of the civil

war, a declaration of "No victor no vanquished" was issued on paper and Biafra was once again under Nigeria and thus tacitly making the presidency out of reach to them due to the war. (see [Elaiwu, 2009](#); [Forsyth, 1992](#); [Gray](#) and [Stolper, 2003](#)).

The census of 1991 was a repeat pattern again of keeping the formula ratio inherited from the British with data: 41,242,512 for the South and 47,261,962 for the North. The main travesty as noted by [Sagay \(2008\)](#) was the apportioning of same size populations relatively to Lagos and Kano state, even though it is obvious Lagos population as at 1991 about 15 million was 3 times that of Kano state. This travesty was further enshrined in allocation numbers with the allocation of 20 local government councils to Lagos but 71 local government councils to Kano and Jigawa states (Note: Jigawa state was carved out of Kano state). As if this wasn't enough, Lagos had 24 Federal house representatives while Kano and Jigawa had 35 Federal house representatives.

These numbers add up to no bills can be passed in the house without the consent of the North, but the reverse wasn't true for the South. This political arrangement as chronologically described has been made possible by the British colonial masters, the so called Arewa political oligarchy and the northern military organisation. Hence the northern or so called Hausa-Fulani Hegemony and so called "Born to rule" tag that still sticks today.

Through history, the immense capital of the Sultanate has been used by the hausa -fulani elite to maintain political dominance this has taken unquestionable hold and morphed into hegemonic (which includes its born-to-rule mentality) control of all things Nigeria indirectly. (Okonofua , 2011)

The tag sticks because it is constitutional. 100% of the crude oil wealth comes from the South, but because the North have 418 to South's 356 local government councils, they get more of the 85% oil wealth that enters the federation purse. Mind you each local government council gets equal share of wealth. Okonofua, 2011; Okonta & Douglas, 2003; Sagay,

2008; Ukeje, Odebiyi, Sesay, & Aina, 2009).

So considering the ethno-religious make of Nigeria. If we ask at this point- Will restructuring change the attitude of Nigerians to Nigeria?

It will seem that the North will like to restructure according to the muslim partimonial system they are already used to, and the South will want to restructure to Christian capitalist system that rewards them equitably according to what they is contributed into the national treasury.

However even if this were to happen, what will be the outcome? what will it change long-term? The answer to that question will involve us looking deeper as to the motivation of the civil servants that implement the instructions of the ruling elite.

It becomes clear that regardless of which part of the country any civil servant is from, their primary motivation and expectation from fellow Nigerians is usurping of power, prepostrous aggrandization, and acquisition of stupendous wealth.

There lies the behemoth of the problem that the talented tenth, if they can find themselves passionate enough to solve home land problems.

In the Final analysis- the “talented tenth” will have to amicably wrestle with these issues, to agree nationally and then

influence.

Who are the TALENTED TENTH?

The talented tenth exist in all societies across the globe, these are the elite by merit, the erudite, the learned, the societal role models and celebrities at high tables across the nation. The talented tenth hold the keys to institutionalising anti-corruption, to decoupling tribalism when having a national discussion about restructuring. At the moment and based on the primordial setup of Nigeria without the deep thinking of the talented tenth, restructuring will mean simple redistribution of wealth so the oil rich states keep their oil wealth and the northern states manage with their agricultural produce especially groundnut, tomatoes and beef. Without the deep thinking of the talented tenth, there will be failure to recognise that crude oil and products accounts only for 14% of GDP but 80% of foreign exchange. Without deep thinking, there will be failure to recognise that the western crude oil importing economies are weaning their dependence on fossil fuels, that in only 10 years from now there will be less demand for Nigerian sweet crude.

Apart from diversifying our economy and figuring this into a restructured formula, the talented tenth should permeate the civil service because before Nigeria can restructure successfully from the present unfair formula, she first must re-engineer her culture. This is true because corruption is now really an accepted and expected culture, which means the corrupt northerner and southerner, easterner and westerner all speak one language of Corruption, that they are speaking now, and will continue to speak in a restructured Nigeria that isn't yet accultured to see corruption as a taboo.

This is why Debonair Training has a special module for this ebook on Blaming the West for Africa versus taking responsibility for Africa. The ulterior motive of divide and conquer of the colonial British is well known, however through a learning technique known as SCAFFOLDING we can clearly see the opportunity and rewards of not blaming the British but instead take the opportunity to fix the problem from the root, with return of investment approach of proactive and collective action
www.debonairtraining.com/moodl...

President Buhari who is a Fulani, and commander in Chief of Nigeria who

is evidently stuck between the devil and the deep blue sea. He is a devout Muslim, a Herdsman himself, who's nomadic culture he inherited, they conquered his native Daura people, well before his time, and the herdsman custom is still subsisting in the culture. but Buhari is already leading the Nigerian people. So Islamization rumours will continue to fly, especially when the government of the day hasn't yet dealt with rampaging Fulani herdsman. It doesn't take much insight to realise that the fear of Southerners includes that armed herdsman are one step or two away from being transformed to rampaging Janjaweed on horseback as happened a few years back in Darfur and Chad.

Clearly from the data in this chapter: the British rigged the Census data in favour of the North, and this formula has been somehow repeated. The reason the British favoured the Northerners apparently is still the reason the Southerners are yet to correct this anomaly for now. This issue will come to the fore again and again, because whenever the Southerners despite their differences, interpret any situation to be an existential threat, they will unite against the threat. Then the numbers will be laid bare and the error of where power is CONSTITUTIONALLY domiciled will either be corrected by the leader, or the Nigeria union will become untenable.

Chapter 3: Blaming the West vs taking responsibility

Chapter 3:

Blaming the West vs taking responsibility for Africa!

June 21, 2012 at 1:41pm

Who really has cognitive dissonance? The one who blames the West for African problems or the one who believes Africa should be responsible for herself, and has the power to discipline and lift herself to glory regardless of western national interest policies?

This question is of prime importance because while considering restructuring, if we focus on only correcting the unfair Nigerian control anomaly we may end up correcting a problem that applied in 1960, instead of one that applies in 2017 and the foreseeable future.

Getting defensive in arguments that excludes us from any responsibility for our problems is really an insult to our intelligence. Bad is bad and good is good, clearly from the fruits of anything you can tell if its good or not! All of this is without making reference to any text written by anyone, to make one believe, nothing is good or everything is bad about us.

Consider modern day slavery, also known as human trafficking. People pay money to go abroad for a better life, even though they have heard stories of this possibly being getting enslaved into prostitution. They see it as

away to raise money back home.

Is this not the same reason (but 21st century reason) that started the trans - atlantic slavery many centuries ago. People selling their own people, because tacitly, the borrower is a slave to the lender!!!

Nigerians cannot use double standards to point a finger at what wrong colonialists did to Nigeria and what the neo-colonialists policy is still doing at present to African nations, when Nigerians do worse to their own people.

Clearly they (the whites) don't have 2 brains each. because If one weighs things correctly with accurate measurements they will get accurate results, therefore whatever the collective build together will hold up this is logical. However when a people use make-believe facts, combined with a vindictive and bitter attitude, they actually worsen their plight. This often proves the case, because it is most often the case that with most Nigerian collective efforts: the weakest link sabotages the effort for their own individual greed, this is easily repeated when the saboteur knows the blame will be wrongly placed at the the feet of the Whites who tempted him, as opposed to him, the responsible person who fell for the temptation.

Politicians will join you in condemning neo-colonialism, but they will be the first to want to steal from the masses, and then send the monies to the former colonial Master, they will steal even more, and deposit it to the same place - Swiss banks.

This is because most of the politicians know that given half the chance, the very same masses they are stealing from are waiting their turn to steal. Most of these politicians are not true leaders. nor were they elected for their high level of accountability with public funds.

So really the cognitive dissonance is really about the Nigerian people collectively unable to deal with this double standard. That somehow we refuse to grasp the core of our problems, to look in the mirror collectively, to help ourselves by whistleblowing on the individuals giving the collective a bad name.

Instead of dealing with this double standard, it is commonplace in our discourse to find tacit and tactful approval of amoral behaviour. The

refusal to consciously confront and purge Nigerian communities, even households by those who live with them of their perversion we end up tainting ourselves. The media is awash with narratives that gives power to conspiracy theories; most of these temporarily do make us feel better, as it allows us to point the finger temporarily at someone else being the cause of the problem, regardless of it is true or not that seldom make us better whether they are true or not,

Conspiracy theories: may make us feel good debating with our peers, for the simple reason that to the simple or even myopic mind, we want to be absolved of blame and responsibility. But to the

learned person, who has learnt to think longterm, they know the value of taking responsibility for problems, because it gives them control over their own future. On the other-hand those blamed, actually by default are given the responsibility to control their or any future, whether they accept the blame or not.

This principle works anywhere any time, lets think about it!!!

Surely there is a lesson to be learnt here by us, enlighten us if you disagree??

Those who blame are weaker than those who take responsibility for the blame. True or False?

For the print version readers of this book, the following is a summary of a heated social media thread discussion that occurred 5 years ago in 2012, during the leadership of Goodluck Ebele Jonathan. This discussion proves with data analytics that over 70% of us are content to blame the West and absolve ourselves of blame. When it comes to playing the blame game, the blamers are intransigently dug in with their perspectives, branding with name calling a school of thought that calls for objective analysis as one that is EUROCENTRIC, and then referring to their own blaming school of thought as AFROCENTRIC. There is more to the Eurocentric versus Afrocentric debate, but simplifying the concepts with a lot of assumptions, is one of the bigger problems, that is defying a solution thus far. In this particular discussion, I point out that there are double standards

involved in the blame game, and worse of all, the blaming mentality tacitly allows us to shirk responsibility for our problem, as if we are hopeless and helpless post-colonialist intervention. I further argue this should not be the case because there were other countries colonised by the British; which are doing very well, such as USA, Australia, and India.

For the digital e-book version of this book, this innovative publication allows you to directly immerse yourself into the research data for learning and contribution to our collective development. Clicking on the first link on the conversation hyper-link points in the following discussion, opens up the live discussion thread in a separate pop-up window.

NOTE: In social media discussions, the flow is instantaneous with little time to correct typo's, and part of the beauty and learning points is that of participation. In elearning this is referred to as SITUATED PEDAGOGY or what is loosely referred to as practical learning through participation.

NIGERIAN UNITY IN CONTEXT OF WORLD HISTORY

This is a note based on an article by Tope Fasau, posted by a fellow comrade Christie Akumabor.

I am republishing it, because yesterday, i blew a fuse (metaphorically).

Disunity is our bane, leaving us distracted & distrustful. None of us wants to waste our life albeit clearly lives are wasted everyday, needlessly.

...

This chapter enunciates why it is important for us to grasp the unresolved blames and responsibility, because without clarity of what is what, the tendency of getting every other component wrong in Nigerian development is also high.

You may continue in the debate by commenting in the thread that has popped up, before reading the next chapter, to explore the digital opportunities both for now and the future, when crude oil revenue will no longer be available or relevant for wealth redistribution or political restructuring.

So asking our research question, how does blaming the west and shirking responsibility affect positions on restructuring?

Will it be wise to restructure a country when most of the indigenes or citizens have not realised their rights and responsibilities in the constitution?

Debonair training has a [DVS online class on the 1999 Nigerian constitution](#).

Chapter 4: Digital Technology opportunities in Nigeria

Recently Professor Wole Soyinka was credited with, incisively summarising the RESTRUCTURING DEBATE. To paraphrase him: The poor in Nigeria have the same things in common, the rich in Nigeria have the same things in common, while the rich are united and keep the possessions they have obtained, the poor are disunited and fighting each other, and being dispossessed some more of the little they manage to cling on to.

I find the above to very true, and all the more reason why the restructuring at the moment is really about Oil wealth and redistribution of it so there is more wealth allocation to Southern states where the oil comes from than the Northern states. However, this view needs to be re-examined because indeed as already stated in the previous chapter there needs to be more equitable distribution of power and allocation, although the basis for doing this is still shaky. To start with little is known of what the real economic situation in Nigeria was, is and could be, by those doing the agitation the loudest.

Most do not know of this chart of our GDP resources, nor can they interpret it.

Sector Contribution to GDP in 2015

Those driving the conversation for agitation don't yet comprehend that while Crude oil exports accounts for 90% of foreign exchange, it only accounts for 14% of GDP. They don't yet comprehend why a small infestation of Tomato plants in the North, led to Tomato scarcity that caused inflation of stable Tomato based products, that affects hunger directly. Most Nigerians haven't learned the lesson of the "Ghana must go bag". In other words the same Northerners that you think you are subsidising due to the Oil in the south, may be the one feeding you right now with their produce.

However digital technology, in this case DATA ANALYTICS in the 21st century allows us to see clearer, so we know exactly what is what, with the ability to not only collect data, collate it, cleanse it, datamine it and draw business intelligent decisions that allow us to stop proverbially shooting ourselves in the foot or going around in vicious cycles.

Such digital opportunities are currently being exploited in the services sector in the graphic above, but there are many more datamining and business intelligence opportunities still lying fallow until recently such as directly applies to:

1. Genuine Digital Identities: Myriad technologies including biometrics used for the current BVN or the RFID technology which can be temporarily augmented with existing BVN biometric ID to make for a compulsory national ID: Doing this is not difficult and is simply the government rolling out a policy to licensed agents at banks to digitally verify their ID according to digital standards by trained agents in banks. This alone is a source of employment for the budgeted project, once the policy is government backed.

This alone will solve many problems including the rampaging Fulani herdsmen farmer clashes, that could be infiltrated by terrorists or armed bandits. It also removes the excuse of they are nomadic with no fixed address.

Once the ID technology is in place with everyone having a unique number it opens the gateway to so much including:

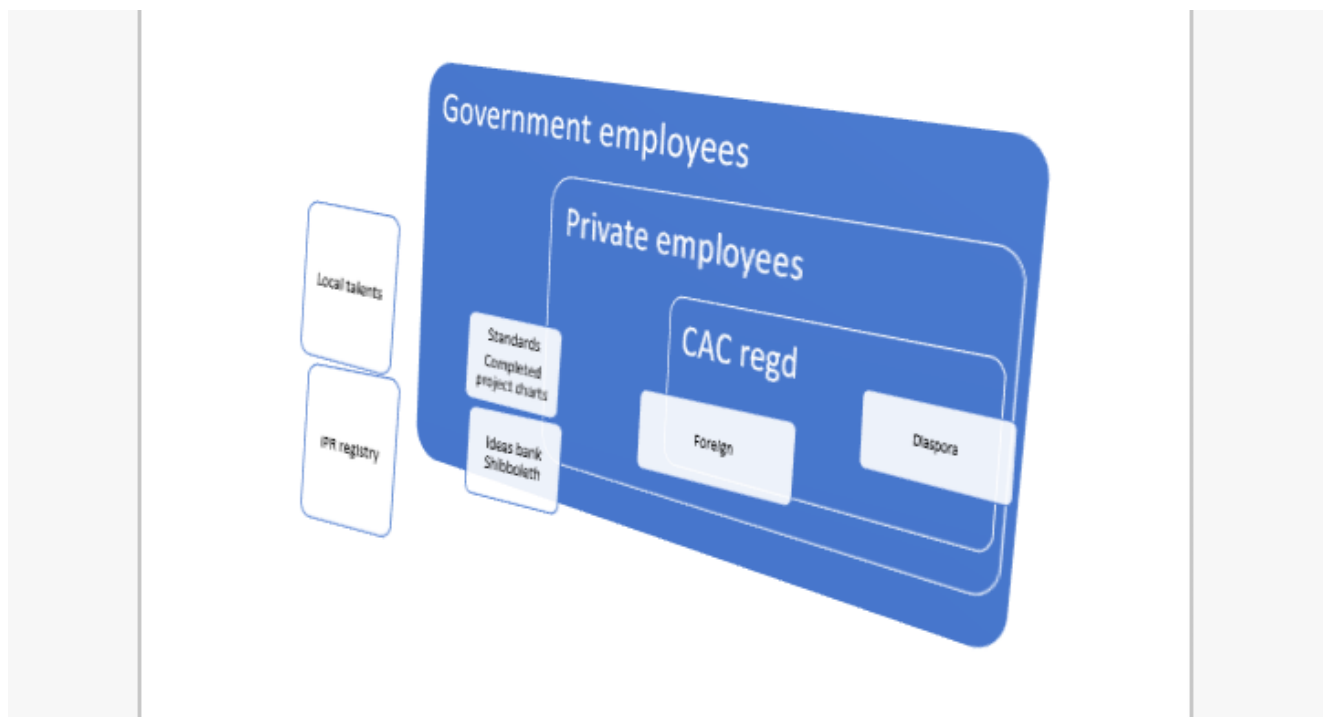

2. Sophisticated national database with open and secure parts

A national database needs to be compiled for the following categories and the benefits for each are below:

Feature	Benefit
All government employees	Tax, benefits, pension, manpower
All private business employees	Tax, talent, skill, cooperative
Special local talents registry	Scholarship consideration for investors
All companies registered in CAC with type of business categorised, size of business, location, age, outlook, tax status	Tax, talent, skill, cooperative, investment banking
All employment agencies according to categories	Human resource data leads
All Nigerian companies registered abroad	Tax, talent, skill, cooperative, investment banking
All foreign companies in Nigeria	Tax, talent, skill, cooperative, investment

	banking
All new intellectual properties in Nigeria	Intellectual capital, R&D investment
All masters dissertation in a shibboleth network	Secure intellectual research sharing and plagiarism deterrence
All phd's thesis in a shibboleth network	Secure intellectual research sharing and plagiarism deterrence
All manufacturers	R&D
Federal and State projects database progress chart	Transparency
Academia and government houses connection	R&D, Shibboleth consultancy
All churches/mosques and charities registered	Regulation and charitable projects monitoring
All government approved regulators registered	Regulation and transparent projects monitoring
All courses including technical	Education and training
Ideas databank	R & D
Standards and awards	Structured Total Quality development and monitoring

Data analytics opportunity by

In this chapter while on this subject we will explore;

1. Nigerian business and digital technology, digital divide, security issues and safeguarding against fraudsters (419ers).

2. Seizing New digital opportunities emerging amidst Buhari's anti-corruption challenges

With digital technology Nigerians will be able to quantify their resources, and have the tools to control its usage in all parts of the country, this applies to any structure determined in the future. As Peter Drucker says; "What gets measured, gets managed".

In the context of digital technology and measurement to management, in the Chapter 2; the best successes enlisted about Nigeria globally is that she is 9th best country in the world with mobile telephony connectivity, with about 1 in 4 people on average having a mobile phone, connected to a network and is also 9th best country in consuming internet data.

This will obviously ping the ears of avid entrepreneurs because digitally in advanced economies the life cycle of mobile telephony is already known. This means in emerging markets such as Nigeria, the potential is huge.

The data also reveals that Nigeria is also one of the least conducive places for businesses to depend on network connectivity. The conflict or difference between the 9th most connected country and least conducive networked country, is where the opportunity will exist within the next 10 years as more reliable networks are produced for the 47 million SIMS to communicate with each other, to accommodate the supply chain of other products and services who will jointly sponsor the opportunity for these reliable networks.

Background of Nigerian economy, digitization and pathways for restructuring

In 2015, Nigeria was ranked 30th in the world, in terms of GDP, Indeed Nigeria still relies on crude oil for 80% of its foreign revenue, but that's only for foreign revenue. As of 2015 crude oil accounted for 14% of GDP. (Source: energymixreport.com).

Nigeria will get the highest average GDP growth in the world between 2010–2050 according to Citigroup. The world bank states that Nigeria has reached lower middle class income status. Ironically most of the growth in GDP hasn't come from Oil and gas, but from ICT growth in the economy. The most recent data suggest that services account for 57% of GDP which was attributed to growth in ICT. The sector grew 7.7% in the third quarter of 2015, above overall growth which slowed to 4.7% in the same period. And the National Communication Commission (NCC) estimated that telecoms contributed up to 10% to economic output in 2015, with the potential to increase to 25% by 2050.

For the purpose of this book: Digital technologies is used to describe the use of digital resources to effectively find, analyse, create, communicate, and use information in a digital context. This encompasses the use of web 2.0 tools, digital media tools, programming tools and software applications. Recently the Guardian published - Nigeria's rapidly expanding middle class is driving demand for new newspapers, magazines, radio and television

programmes, music, film, and more recently, digital media of all sorts. Thus Nigeria is the single fastest and largest media market in sub-Saharan Africa, and a handful of Nigerian media outfits have a pan-African reach. While the digital economy is still in its early days, its future is promising.

Following the 2008-9 global financial crises, the banking sector was effectively recapitalized and regulation enhanced. Since then, Nigeria's economic growth has been driven by growth in agriculture, telecommunications, and services. Economic diversification and strong growth have not translated into a significant decline in poverty levels, however - over 62% of Nigeria's 170 million people still live in extreme poverty. **WORLD FACTBOOK**

This means that those brands and individuals that integrate digital technologies into the core of their work will reap the huge benefits when the digital space and market fully matures.

Lagos state residents will be familiar with "Computer Village", where Uche Obi, a dealer in mobile phones and accessories at the Computer Village, Lagos, said digital technologies have impacted so much on the way businesses are run. "For me, I upload my business online, giving me access to several millions of buyers out there, and I sit in my shop and transact business worth millions of naira, using digital technology tools," Obi said - as found in an Accenture 2015 Survey.

According to the Guardian, At present there are over 100 million digital subscribers, with 100% penetration, And it gets better with the expansion of competing national fibre backbone networks, applications such as ecommerce, online banking and e-payments, e-health, e-learning and e-government which are rapidly evolving. The government in early 2015 also committed to increasing broadband penetration from about 8% to 36% by 2018.

Buhari's clampdown on corruption has no doubt disturbed the money flow pathways and business as usual attitude, and this rejigging of the system is no doubt presenting a shock to the economy. Many will argue a more nuanced approach will have eased the burden, others will argue that a cancer such as corruption cannot be treated in 4 years, except by brutally severing off gangrened limbs of corruption, if and when they can be identified in a democratic dispensation. However in this new digital

economy, new opportunities for e-healthcare, e-Agriculture, e-portals for different farm produce, and manufactured products are now becoming not just wanted, but needed, as happened recently when some of my digital friends rudely discovered that the Tomatoes we

take for granted, is by far the staple to 75% of Nigerian meals especially because of our soups and stews. Thus they had to scour the locality for Tomato farmers, as lack of tomatoes and price of it presented an opportunity as much as the scarcity problem.

This is just for Tomatoes, so, with foresight, we can see that because of Nigerians over-reliance on FOREX to get imported products, there will now be more focus for indigenously produced "produce" and products. This is where Digital technology is most needed and where database and data warehousing by [Debonair Training](#) is continuing to fill the gap and market need; harnessing our skillset as IBM certified, experienced, reliable and credible national database provider for industry.

An aggregated database that uses E-Business technology (Business Intelligence and Data Warehousing) to provide multiple categorised data "JIT" - (Just in time) to entrepreneurs, thus facilitating decisions quicker, allowing more thorough research studies enabling hindsight, insight and foresight to meeting the market's needs, and providing solutions to problems faster.

The Rice inflation and recently Tomato inflation, and a few months back Fuel scarcity, could have been solved much faster and effects less obvious, if sufficient numbers of trained "Digital savvy Entrepreneurs" had filled this business space.

The Services percentage of GDP in Nigeria has risen sharply in the last 10 years, essentially due to a tiny "filling of the gap" in the "digital divide. This created enough room for the sector increase, as much as it has increased. However, there is much more room to come and much more innovations in the making, following implementation of existing policies and creation of new ones.

"Information technology is shaping our dreams very significantly. It is a very, very significant tool to prepare the young people for tomorrow and to help us improve the economy for today."

~ Turner Isoun Minister of Science and Technology Nigeria

"How do you educate four million children that you produce every year and prepare them to be competitive in the 21st century? That is our biggest challenge. We must use technology to democratize knowledge."

~ Nasir Ahmad el-Rafai Minister Federal Capital Territory

The above two quotes are from previous ministers of Nigeria, to give us scope of their appreciation of the divide and evidently it hasn't all been lip-service.

Intel and Microsoft corporations have invested deeply in Nigeria and done their research. In a recent paper published by Intel:

It found the following impact in bridging the divide so far:

-
- 55,000 Nigerians have purchased highly capable PCs.

- The capital city of Abuja is covered by a high-speed WiMAX* network.
- Four local PC manufacturers are producing PCs for the program and have increased production volumes by approximately 50 percent.
- Three banks are offering loans, and two have extended the program to their own employees.
- Participating employers include private enterprises, along with federal and state ministries and agencies.
- Internet connectivity
- Delivery and setup
- Two years of robust post-sales technical support, including a six-day-a-week hotline
- Three-year manufacturer's' warranty (parts and labor) plus two years of insurance

Intel aligned the program with government priorities and objectives. The government's goals included building a computer-literate workforce and improving the nation's economy. It decided on an Employee Purchase Program (EPP) that would help private and public sector workers purchase PCs. Intel's survey showed that only 26 percent of Nigeria's workforce felt they had adequate IT skills, and an EPP would be an effective way to boost those skills. Employees would also present a lower-risk lending target than other constituencies might.

This penetration in bridging the digital divide must start from bottom up as well as top down. Concerning secondary schools:

"In terms of exams and test scores, there have been great improvements in the pilot class as compared to other classes in the same grade. I believe the classmate PC introduction caused these improvements." ~ Edegbe Osamwoni Perry Teacher Government J

Nigeria is also the site of Africa's first mobile eLearning school. Corona

Secondary School, which is located in the Ogun state north west of Lagos

and is one of Nigeria's leading private secondary schools, wants to give its elite students the benefits of advanced technology and proven learning models. Building on its already substantial ICT infrastructure, Corona implemented a high-speed WiMAX wireless network and established a program to help parents purchase an Intel processor-based laptop computer. Approximately 200 students and their families have purchased Intel-based laptops through the program, empowering teachers and students to use technology and the Internet in all areas of the curriculum and at any location on campus. Corona's teachers have taken

advantage of the Intel® Teach** program and skool™ teaching and learning resources. "Many students don't like mathematics, but when you take them to the PC to work on it, they become very excited," says Adekoya Mufutau, technology coordinator at Corona Secondary School. "Skool is very interactive, and students like it when the system responds to them. It keeps them working on the system for longer, and they learn more."

Debonairtraining.com combines a slew of technologies, and underlying methodologies to ensure this exciting interests of learners to teachers to content. [The Debonair Virtual School \(DVS\)](#) has as one of its ICT online courses with the introduction to computer basics is a classic example.

The Nigerian Libraries pose an epitome of the "Digital divide", in the digital era, digital access to information in a modern method, will obviously deliver modern results, as opposed to traditional or outdated results.

To paraphrase Bryson (1990): There is a gap that exists between traditional and modern methods of processing, storing, analyzing, retrieving, providing and using information in Nigerian libraries. The digital library (e-library) is a library that stores information electronically and made accessible to users through electronic systems and networks, but having no single physical location.

It is most important for all Article/Blog readers who wish to do their part in bridging the digital divide in Nigeria and indeed Africa, to get their local

=====

All entrepreneurs and budding entrepreneurs who are not yet doing business online must take some level of a "Cyber security training course" regardless of the country they live in. A person could reside in America, and a computer network linked up in China, programmed by hackers, with lead sponsors in Nigeria or Canada could be stealing bank or credit card data from your mobile phone at any time. This also applies to companies, their directors, their employees, their customers and suppliers.

The recent issue that dogged Hillary Clinton in her bid to become the first female US president is really about her seriousness in handling cyber-security. Concerning Nigeria cybersecurity, we will recall Wikileaks also revealed some details about President Goodluck Jonathan while he was in office. Debonair Training Security courses illuminates all the aspects of

security to be considered from beginner to advanced level.

Unfortunately in Nigeria's case, there is already a pervasive fraudulent image that hinders Trust to start with, but simple investment in Security training and software, levels the playing field risk with the rest of the world Again a "[Debonair Training basic security course](#)" provides all of these. At

the end of the modules you will have installed all the software to protect your adequately protect your business as with all our existing clients.

The array of cybercrimes include:

- Identity theft and invasion of privacy.
- Internet fraud.
- ATM fraud.
- Wire fraud.
- File sharing and piracy.
- Counterfeiting and forgery.
- Child pornography.
- Hacking.
- Computer viruses.
- Denial of service attacks.
- Spam,
- steganography
- e-mail hacking.
- Sabotage
- Fake Online lottery,

- Fake accreditation degrees,
- Phishing,
- online banking fraud,
- Credit card fraud

The list goes on, however, as in all crime, there is always the perpetual chase of the law close behind and eventual apprehension of criminals. This long list instead of scare honest entrepreneurs, rather should see this as an opportunity and a job creator for them. The internet world and its digital technology is here to stay and we have only just started exploring its potential globally, we are still only at stage WEB 3.0 with "Semantic databases" that THINK ON THEIR OWN. By 2020 we will evolve into WEB 4.0 which will be about intelligent personal agents. As technology evolves so will the opportunities. The opportunities and profit growth curve will be higher in Nigeria and subsequently rest of Africa, because the digital divide is wider, and the precedence roadmap for policing cybercrime is already mapped out in Europe and America.

In a recent survey by "International Journal of Cognitive Research in Science, Engineering and Education International Journal of Cognitive

Research in Science, Engineering and Education" focusing on APPROACH TO CYBER SECURITY ISSUES IN NIGERIA: CHALLENGES AND SOLUTION, they echo almost exactly Debonair's digital security training points; Instances were studied such as- Elekwe, a chubby-faced 28-year-old man made a fortune through the scam after two years of joblessness despite having diploma in computer science. He was lured to Lagos from Umuahia by the chief of a fraud gang in a business center. He has three sleek cars and two houses from his exploits. In July 2001, four Nigerians suspected to be operating a "419" scam on the internet to dupe unsuspecting foreign investors in Ghana were arrested by security agencies. Their activities are believed to have led to the loss of several millions of foreign currencies by prospective investors. Two young men were recently arrested after making an online purchase of two laptops advertised by a woman on her website under false claims. They were arrested at the point of delivery by government officials. Mike Amadi was sentenced to 16 years imprisonment for setting up a website that offered juicy but phony procurement contracts. The man impersonated the EFCC Chairman, but he was caught by an undercover agent posing as an Italian businessman. The biggest international scam of all was committed by Amaka Anajemba who was sentenced to 2½ years in prison. She was equally ordered to return \$25.5 million of the \$242 million she helped to steal from a Brazilian bank.

Another internet scam case was reported on the Sunday PUNCH newspaper of July 16, 2006 involving a 24-year-old Yekini Labaika of Osun State origin in Nigeria and a 42-years-old nurse of American origin, by name Thumbelina Hinshaw, in search of a Muslim lover to marry. The young man deceived the victim by claiming to be an American Muslim by the name, Phillip Williams, working with an oil company in Nigeria and he promised to marry her. He devised dubious means to swindle \$16,200 and lots of valuable materials from the victim. The scammer later was sentenced to a total of 19½ years having been found guilty of eight-counts against him. Incidences like these are on the increase. Several young men unabated are still carrying out these illegal acts successfully, ripping off credulous individuals and organizations.

Recently, a report indicated that Nigeria is losing about \$80 million yearly to

software piracy. The report was the finding of a study conducted by Institute of Digital Communication, a market research and forecasting firm, based in South Africa, on behalf of Business Software Alliance of South Africa.

The American National Fraud Information Centre reported Nigerian money offers as the fastest growing online scam, up to 90% in 2001. The Centre also ranked Nigerian cyber-crime impact per capita as being exceptionally high. Those involved are between 18-25 years mostly resident in the urban centers. The internet has helped in modernizing fraudulent practices among the youths. Online fraud is seen as the popularly accepted means of economic sustenance by the youths involved. The corruption of the political leadership has enhanced the growth of internet crime subculture. The value placed on wealth accumulation has been a major factor in the involvement of youths in online fraud.

At Debonair Training, the solution to cyber crime in our **Training modules** include at different levels:

- General Data protection and hacking prevention habits and discipline
- Education on potential abuse of data and cost
- The law and intellectual property introduction
- Location Verification
- Identity verification
- IP verification and tracking
- Networking with CCTV monitoring system
- Antivirus and Worms
- Firewalls
- Encryption and sensitive financial transaction guidelines plus added
- layered intrusion prevention software

In Nigeria, we have found that the most vulnerability could be in "Phishing". Phishing is a method used to compromise the computers of and steal sensitive information from individuals by pretending to be an email from or the website of a trusted organization. For example, a person receives an email that appears to be from the recipient's bank requesting that recipient verify certain information on a web form that mimics the bank's website. However with the right training, a trained up person or organisation employee will not make themselves vulnerable to such cyber-crime and will have a layered protection system in place. For more information email securitycourses@debonairtraining.com

PROFIT OPPORTUNITIES AND SUCCESS STORIES

THE WEALTH IN MOBILE DEVICES

There is an opportunity for all existing businesses who already have business websites, to upgrade them to web 3.0 and mobile device compliant, and at the same time include GOOGLE MAP. When optimised for SEARCH ENGINES, it means customers can easily be guided to find you at your location and park their car in your designated business Car park. This gives you a competitive edge.

Smaller businesses and restaurants or shops can get their chief I.T person TRAINED to either upgrade the company's corporate website or to support the bespoke e-business solution produced for the

client. For more on this or a demo email mobile@debonairtraining.com

WEALTH HIDDEN IN PLAIN VIEW

Debonair Training is currently capitalising on the market gap in the digital divide, in the well researched market share. There is so much untapped wealth simply because of unrecognised and as yet still unaggregated data. Using accumulated E-Business skill and experience Debonair Training is partnering up with marketing and research organisations to populate existing and new data warehouses in Nigeria with Nigerian information. Partners have already experienced what can be done using Customer Relationship Management (CRM), Business Intelligence (BI) and Supply Chain Management (SCM) technologies. So if you are business analyst entrepreneur, a marketing and research executive or a call center director, looking for partners to tap into this wealth to chart Nigeria's fantastic digital future, browse [Debonair Training digital and training portals](#) or email directly now data_partnership@debonairtraining.com

SUCCESS STORY OF JUMIA IN ECOMMERCE

The advent of e-commerce giants Jumia and Konga in the Nigerian space has also led to a dramatic opening in the industry calculated to be worth US\$13 billion in 2018. Reduction in costs and access to large numbers of people are major reasons driving the establishment of more internet solutions and the shift from physical to online. Ultimately, success in this industry will largely depend on new innovations that guarantee comfort, ease, and fast feedback. Debonair Training is one of the few Tech

companies seizing advantage of the current economic climate to provide bridges to profitable digital opportunities in Nigeria and for Nigerians in diaspora. For start ups that will be future Jumia's. For more on this e-business campaign approach email campaigns@debonairtraining.com

THREE WAYS THE INTERNET

HAS CHANGED POLITICAL CAMPAIGNS

POWER OF DIGITALLY GUIDED CAMPAIGNS AND REFORMING GOVERNANCE STEP BY STEP USING SOCIAL MEDIA AND VETTED PEER GROUPS

The recent election that brought President Buhari to power erased any doubt in the minds of cynics who said what works in America doesn't work in Nigeria or Africa. It became very clear to all what a well thought out and persistent strategy influences. I personally can testify to its power because I and my team were right in the middle of it as a skilled digital technologist as well as digital warrior collaborating with a team of other warriors. Together we led a legion and flooded cyberspace with the message of change, and leading a team of other warriors we galloped to victory.

We studied the tactics of a relatively unknown Senator from Illinois rose from obscurity to the White House and followed his CRM driven road map to deliver relatively similar success for a Nigerian state governor aspirant.

The CRM driven road map is documented here:

<https://drive.google.com/open?...>

Also how he rode to victory integrating 13 Million facebook fans to fuel his record breaking attended speeches, cum making it count at the ballot box:

<https://drive.google.com/open?...>

Now all these digital warriors coalesced due to our common theme groups on social media. This ability to coalesce in groups of like minds on demand is the one remaining power, to be really untapped to unleash Africa, and its already happening. This is the space Debonair Training is filling and scheduled to roll out innovative products soon with global partners.

Another example of the power of social grouping in a realworld pressing problem and solution that Debonair Training has taken the initiative on is

relationship MATCHMAKING. Upon doing the research, the market is greenfield thus FB Matchmaker is successfully matching clients, especially Nigerian ones www.fbmatchmaker.com

Chapter 5: Nigerian unity in context of world history

NIGERIAN UNITY IN CONTEXT OF WORLD HISTORY

May 2, 2013 at 10:32am

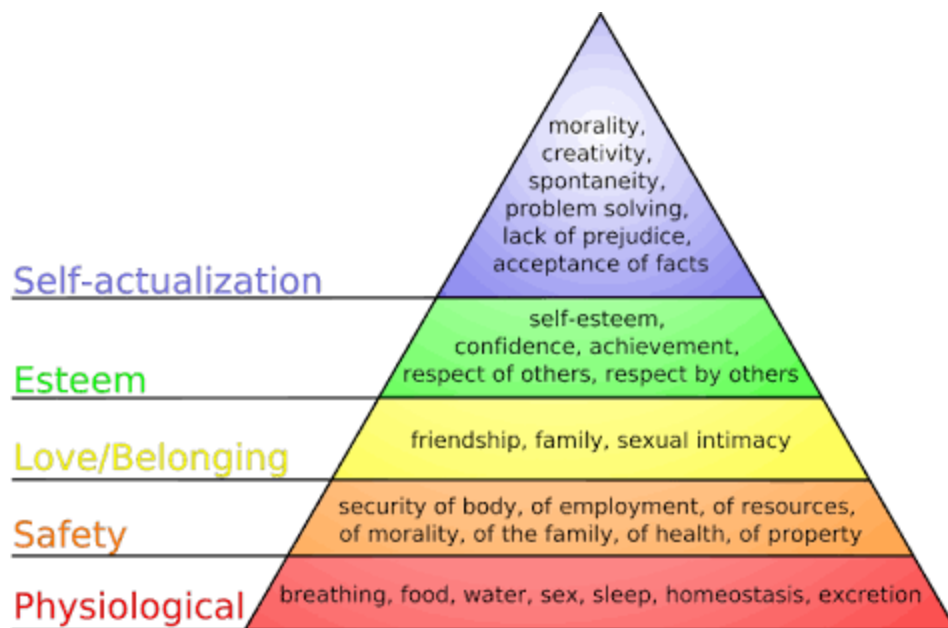

May 2, 2013 at 10:32am

On a fateful day - May 2, 2013, i blew a fuse (metaphorically).

Disunity is our bane, leaving us distracted & distrustful. Naturally no Nigerian wants to waste their life, albeit clearly lives are wasted everyday, needlessly.

On the roads, in the hospitals, in our crime ridden cities, in police cells, in prisons. From over-working overseas in their host country, without commensurate reward, or from scam artists emptying life's saving.

Regardless of who WE are or where WE are, collectively WE are all near the bottom of the pyramid, barely secure with our lives and belongings. All of this, because we resist unity and according to Fasau, OVERRATE ourselves and our problems.

This is one of the key reasons why restructuring Nigeria without addressing cultural issues will not have a long term effect, such that after about 2 years we will be searching for another solution again, if those who have the foresight do not speak up with a loud enough voice now!!!

E-book version only: H5P OF NIGERIA DEVELOPMENT FROM TRIBAL LOIN CLOTH TO MODERN DAY WITH IMAGES AND VIDEO FROM INDIGENOUS NOTE, EACH IMAGE/VIDEO HAVING A SHORT DESCRIPTION .

Tope Fasau wrote: "NIGERIANS, STOP OVERRATING YOURSELVES AND YOUR PROBLEMS#

So Nigeria was formed illegally? Good, so were 99% other countries in the world. Australia was a colony where british convicts were settled and made to work for 7 years as penance for crime. Ireland was dismembered, and the southern part only got their independence in 1922. USA was a country made up mostly of white slaves - many from Scotland and Ireland, who were forced to go to the 'new world' to work and toil for their masters. They were treated like freeborns only when the black slaves started to arrive from Africa and some of them started teaming up with blacks to escape. The freedom they got was that they got a small piece of land after working for about 15-20 years.

The state of Georgia in the USA was created as a colony for people declared bankrupt in Britain to come and work for years to pay back their

debt. The 'red Indians' were totally exterminated, just like Australian

aborigines. Mexico was 419ed out of vast territories like California, New Mexico, The Carolinas, and Arizona, to name a few. Costly wars were fought. Many even believe in the USA that the few founding fathers never spoke for them in agreeing a merger of the states. It used to be that every state stood alone. Who really appointed the Jeffersons and Washingtons to speak for the people? could the agreements reached by those bourgeoisie merchants and scholars be said to be really representative of the wishes of every american? till date, many people from southern states want to break away in the USA.

ALL other African countries were created arbitrarily by colonial masters of different hue and cobbled together by force. Nigeria and Ghana, esp Nigeria, stand out as one of the freest in terms of intellectual thought and politics. It seems true that in Francophone African countries, one of the agreements signed with France as they grudgingly granted independence, is that any mineral 6 metres into the ground, belongs to France. Liberia - the only country colonized by the almighty USA in Africa - is no more than a slave camp till date. They speak 16 languages there, and are only 3.5million! Ghana speaks about 60 languages - 40million of them. I believe Africa has more reason to unite and have large countries than any other peoples because of our peculiar history and the need to help ourselves. Someone said there were 10,000 independent NATIONS in Africa before the white man came and amalgamated most of them. Do we expect, seriously, that there will be 10,000 countries in Africa, all with ambassadors in different countries??

India was forced together as a country by the Brits as well. They would have been larger than China if Pakistan and Bangladesh hadn't broken off. Today, a bitter war still rages, and india is still made up of very disparate tribes, clans and castes, from almost white people to very black people in the south! China was formed by force. The Zhonguo Empire as it was known managed to force many people to stay together, from eskimos to muslims who look more like europeans. there are even black chinese! Canada was created by force - wars between France and England for territory led to some parts - Quebec - speaking French and the others speaking English till today. Even England was created by force. the name London is from Londinium an 11th century name given by the romans who

ruled the world then, who created the city. Everywhere I look, there is nowhere where they called a large referendum in those olden days to ask the people 'do you want to stay together?'.
I SAY NIGERIANS OVERRATE THEMSELVES, OVERRATE THE SO-CALLED PECULIARITY OF THEIR CIRCUMSTANCES. I THINK WHAT WE SHOULD DO IS TO POSITIVELY BUILD ON OUR REALITY AND URGENTLY SEE THE IMPERATIVE OF UNITY. I THINK THE REASONABLE ONES AMONG US SHOULD KEEP COMING TOGETHER SO THAT WE CAN REASON OUR WAY OUT OF OUR QUAGMIRE. I THINK WE SHOULD START REALISING THAT HAVING A COUNTRY TO CALL ONE'S OWN IS REALLY A PRIVILEGE, THAT WE SOUND LIKE CHILDREN WHO, GIVEN ONE TOY IN HAND, KEEP ASKING FOR DIFFERENT OTHER TOYS... . I THINK PEOPLE SHOULD READ WIDE AND OPEN THEIR MINDS, ELSE WE WOULD ENTER RASH SITUATIONS BASED ON HALF KNOWLEDGE AND MYOPIA

I leave us with these three great quotes of Achebe, which speaks to this subject very aptly...

"When brothers fight to death a stranger inherits their father's estate."

"The man that brings ant-infested faggots into his hut should not grumble when lizards begin to visit him."

"A disease that has never been seen before cannot be cured by everyday herbs."

"A disease that has never been seen before cannot be cured with everyday herbs."

SO WHAT DO YOU MAKE OF THIS, MY FRIENDS?

Offiah Nonye

Offiah Nonye @Greg so true, a 9jrian in diaspora should try to get in power so we can implement all we've learnt. You go for President Greg, I will definitely support you. All Nigeria needs is light , water, proper environment for life to flourish. we don't even need a benefit system...

Greg Ekhatör

Greg Ekhatör Thanks again Tope Fasua for the original article my article is based on.

You are highly carried

This chapter aims to give us a brief on World history and mirror our prevalent thoughts back to us in the socratic questioning format. The questions and answers contributed are on average very typical of Nigerians and it proves how much entitlement mentality we do have partly due to myopia, and indeed incomplete knowledge.

The good news is as shown in Chapter one, the gaps in our knowledge can be rapidly bridged because we are relatively excellent at studying andragogically online. Debonair Training and other elearning experts are currently designing and deploying training courses along these lines. In the very near future much more courses will be designed as standard, taking all of these factors into consideration, so the main goal of the online course is grasping enough of the students attention to ensure measurable constructive meaning and learning is occurring just as intense if not more than occurs in the as of yet traditional classroom.

It is the availability of these kind of learning classes with these kind of crash course history modules that will guarantee that when there is restructuring, all sides will not feel disenfranchised due to heightened understanding of the process and the social contract they are signed up to in Nigeria.

Chapter 6: Foreseeing a restructured Nigeria

TRIBALISM AND DISUNITY PROBLEM

April 24, 2013 at 1:23pm

In 2017, restructuring is the buzz word, but the Restructuring discussion has been trending in some circles for a while. It is only now trending nationally because Nnamdi Kanu has agitated enough about it with a copious dose of tribalism backed with the demand for secession.

Recently I said in a speech “Sometimes I feel the pain Wole Soyinka, Chinua Achebe and Emir Sanusi Lamido Sanusi (popularly known as SLS), as there were just not enough intellectuals in their class, to effect a sustained change in School of thought”

This is so because when we ponder our ethnic or tribal tendencies, it inhibits a progressive society, particularly meritocracy. This chapter will enable us foresee the problems in restructuring Nigeria without us first dealing with the primordial tribal problems mentioned in Chapter 2.

This was originally an interactive article reproduced here in this book for

immersive learning, as readers identify with the contributors thoughts or not.

Bear in mind that this article was written in 2013 before SLS became the Emir of Kano. One of the brilliant Nigerian leaders of our time:

My friends, this is an interesting speech given by Sanusi (SLS), based on a book titled "Nigeria, Africa's failed asset"!!! He echoes my thoughts

exactly on the issue of tribalism and disunity; perhaps because I had done the research and can verify he is historically correct.

Sanusi Lamido's Response To Sir Olaniwun Ajayi's Book by idiopathic:
6:17pm On Feb 08, 2011 Sanusi Lamido's response to Sir Olaniwun Ajayi's book titled "Nigeria , Africa 's failed asset"

" It attracted many important dignitaries, intellectuals and some governors. Sanusi faults Olaniwun Ajayi on Northern domination. The then Central Bank Governor, Sanusi Lamido Sanusi, surprised guests present at the Muson Centre for the launching of the book.

The argument by discussants centered on whether or not the colonial masters laid the foundation for the problems Nigeria is currently facing. Many argued that the British loved the North and that was why it gave more than 50 percent of the National Assembly seats to the North at independence. Sanusi, however, stole the show when he spoke. His speech was anchored on the plank that the British and Nigerian rulers are

responsible for the state of the situation Nigeria finds itself today. Below is his unedited speech.

"Let me start by saying that I am Fulani (laughter). My grandfather was an Emir and therefore I represent all that has been talked about this afternoon. Sir Ajayi has written a book. And like all Nigerians of his generation, he has written in the language of his generation." My grandfather was a Northerner, I am a Nigerian. The problem with this

country is that in 2009, we speak in the language of 1953. Sir Olaniwun can be forgiven for the way he spoke, but I cannot forgive people of my generation speaking in that language." Let us go into this issue because there are so many myths that are being bandied around.

Before colonialism, there was nothing like Northern Nigeria, Before the Sokoto Jihad, there was nothing like the Sokoto caliphate. The man from Kano regard himself as bakane. The man from Zaria was bazazzage. The man from Katsina was bakatsine. The kingdoms were at war with each other. They were Hausas, they were Muslims, they were killing each other." The Yoruba were Ijebu, Owo, Ijesha, Akoko, Egba. When did they become one? When did the North become one? You have the Sokoto Caliphate that brought every person from Adamawa to Sokoto and said it is one kingdom. They now said it was a Muslim North." The Colonialists came, put that together and said it is now called the Northern Nigeria. Do you know what happened? Our grand fathers were able to transform to being Northerners. We have not been able to transform to being Nigerians. The fault is ours. Tell me, how many governors has South West produced after Awolowo that are role models of leadership? How many governors has the East produced like Nnamdi Azikiwe that can be role models of leadership? How Many governors in the Niger Delta are role models of leadership? Tell

me. There is no evidence statistically that any part of this country has

produced good leaders. You talk about Babangida and the economy.

Who were the people in charge of the economy during Babangida era?

Olu Falae, Kalu Idika Kalu. What state are they from in the North?"We started the banking reform; the first thing I heard was that in Urhobo land, that there will be a curse of the ancestors. I said they (ancestors) would not answer. They said why? I said how many factories did Ibru build in Urhobo land? So, why will the ancestors of the Urhobo people support her?"We talk ethnicity when it pleases us. It is hypocrisy. You said elections were rigged in 1959, Obasanjo and Maurice Iwu rigged election in 2007. Was it a Southern thing? It was not.

"The problem is: everywhere in this country, there is one Hausa, Ibo, Yoruba and Itsekiri man whose concern is how to get his hands on the pile and how much he can steal. Whether it is in the military or in the civilian government, they sit down, they eat together. In fact, the constitution says there must be a minister from every state."So, anybody that is still preaching that the problem of Nigeria is Yoruba or Hausa or Fulani, he does not love Nigeria . The problem with Nigeria is that a group of people from each and every ethnic tribe is very selfish. The poverty that is found in Maiduguri is even worse than any poverty that you find in any part of the South. The British came for 60 years and Sir Ajayi talked about few numbers of graduates in the North (two at independence) . What he did not say was that there was a documented policy of the British when they came that the Northerner should not be educated. It was documented. It was British colonial policy. I have the document. I have published articles on it. That if you educate the Northerner you will produce progressive Muslim intellectuals of the type we have in Egypt and India. So, do not educate them. It was documented. And you say they love us (North)."I have spent the better part of my life to fight and Dr. (Reuben) Abati knows me. Yes, my grandfather was an Emir. Why was I in the pro-democracy movement fighting for June 12? Is (Moshood) Abiola from Kano ? Why am I a founding director of the Kudirat Initiative for Nigerian Development (KIND)?

"There are good Yoruba people, good Igbo people, good Fulani people,

good Nigerians and there are bad people everywhere. That is the truth.
"Stop talking about dividing Nigeria because we are not the most populous country in the world. We have all the resources that make it easy to make one united great Nigeria . It is better if we are united than to divide it."Every

time you talk about division, when you restructure, do you know what will happen? In Delta Area, the people in Warri will say Agbor, you don't have oil. When was the Niger Delta constructed as a political entity? Ten years ago, the Itshekiris were fighting the Urobos. Isn't that what was happening? Now they have become Niger Delta because they have found oil. After, it will be, if you do not have oil in your village then you cannot share our resources."There is no country in the world where resources are found in everybody's hamlet. But people have leaders and they said if you have this geography and if we are one state, then we have a responsibility for making sure that the people who belong to this country have a good nature.

"So, why don't you talk about;

we don't have infrastructure,

we don't have education,

we don't have health.

We are still talking about Fulani. Is it the Fulani cattle rearer or is anybody saying there is no poverty among the Fulani?", he said.

NOW MY FRIEND, - WHATS YOUR OPINION OF THE TRIBALISM AND DISUNITY PROBLEM? -

DO YOU AGREE WITH HIM, OR NOT? - OR BETTER SUGGESTION?

I think the question we should be asking now is how do conquer or cure this madness. Because, tribalism has eaten up most of these fellows to the

extent they see it as a normal thing in life, and if there is no preventing measure taken they might even turn to racist towards their same race.

So from all the contributors here including Emir Sanusi, it seems most
Nigerians are putting the Cart before the horse if they restructure without
addressing acculturation to Nigeria?

You can still contribute to our ongoing education on the issues by
[commenting on the original article here](#).

Chapter 7: Nigerian Political Ideology

Chapter Five

Nigerian Political Ideology

.This chapter will focus on the brand of democratic politics practiced In Nigeria, and an open social media proposal I made in 2012 when the Jonathan administration held sway.

The Nigerian political system is modelled after the American presidential system of governance, and as such at the very least just like the American political system that perpetuates right and left ideologies from the best of American values, similarly - there should be known political ideologies that flow from our collective values held dear by Nigerians.

PROPOSAL DOCUMENT FOR CHANGING
SHIFTING NIGERIA IDEOLOGY AND POLITICS
TO FIRMLY ONE OF ISSUE BASED POLITICS

February 6, 2012 at 8:21pm

I am not a politician, however it is clear we have concerns the way democracy is practiced in Nigeria, and we can either continue criticizing it or come up with bullet point proposals and examine them until fully thought-out, from execution to benefits; and then actually execute them.

The 2012 Occupy Nigeria movement is an opportunity to inject change into the system for the our NEW NIGERIA's longterm good.

Nigeria political atmosphere can be categorised as this:

Those in favour of:

1. Home grown solutions, bottom up

vs

International, top down solutions

2. Central government

vs

Federal government, State government based approach

3. Religion influenced policy of government,

vs

Separation of religion and state matters

4. The recent anti-gay marriage bill, has fully injected itself into and thus divided us, as for who is

for gay marriage

vs

and who is against, and therefore, reflects family values factor to the electorate.

5. Holding onto our indigenous cultures, even going back to our ethnic ways

vs

Refining our indigenous ways in light of new knowledge and making our ethnic ways work better for us.

6. Opening our markets (as is now)

vs

closing our markets to international trade, like China did for a while.

All 6 of these translate into bread and butter issues, industry and per capita income, when broken down to the implementation of the ideology.

There may be other issues that can be crystallized from our thought patterns, but this is a start, and i suggest we improve on this, and republish for agreement once a week, until we have

an agreement of the NEW NIGERIA ISSUE BASED POLITICS AND
IDEOLOGY!

Note: There may already be initiatives or existing documents like
these, if these be the case lets improve or synergise until we
get an even better working document/plan, to ensure thought-out
change happens.

Many thanks!

(Original by Greg Ekhator for deliberation & refinement,
30.01.2012)

This proposal document is still active for contribution and deliberation, by

you the reader when reading this book via your e-reader. The thoughts and considerations are laid out to be constructed on brick by brick, and value by value, as much as we can agree on incrementally.

So if we ask how will a restructured Nigeria under Buhari differ from the issues highlighted here under the then president Jonathan?

The answer should be: Nothing substantial will have been restructured because the value systems and ideals that work the structure remain unchanged. Therefore when talking restructuring, this is one of the indispensable pillars to be resolved, to re-engineer the Nigerian psyche, to reorient the Nigerian mindset.

Chapter 8: Moral Custody in Nigeria

Chapter 8: Moral Custody in Nigeria

December 10, 2012 at 11:37am

The moral custodians are responsible for the moral decay in the Nigerian Society. They failed to check it while they could. It is pertinent that right thinking citizens who know of the Bible speak up with their knowledge of the scriptures; to dispel this pervasive “Vague dread of the supernatural” that allows this perversion of the holy Word.

This is why when considering RESTRUCTURING, there should be much consideration of the importance of the American constitution, which the Nigerian constitution is modelled after.

In the American constitution the SEPARATION OF CHURCH AND STATE is enshrined and is often invoked. This should apply in Nigeria as well. In

Nigeria's constitution it is actually enshrined, but it perhaps has never been invoked.

In the south of Nigeria, the proliferation of Churches is perhaps the most in the world. However recall Nigeria's position in most corrupt countries index: The Corruption Perceptions Index (CPI) - Rated 136 out of 176 countries and scored 28.0

It got so bad, in Anambra State recently there was drug related shooting in the Church. The moral problems that bedevil Nigria are also bedeviling the church including tribalism and nepotism as reported recently in the [local](#)

dailies despite the Pope encouraging acculturation while spreading the faith.

The aim of this chapter is to identify, isolate the Nigerian moral problem and chart a simple roadmap to the solution.

Summary

The Nigerian moral values have been steadily eroding since the 1970's. All of the 6 isolated groups of moral custodians are complicit, but the most important one responsible for this decay in our moral values are the religious moral custodians, especially because they are the only moral custodians who can reach the collective conscience of the Nigerian people.

In our history the Nigerian government leaders have abjectly failed as moral custodians, and have instead become role models of corruption and squandermania, In Nigeria's history there have been two occasions when the masses protested nationwide, on each occasion the religious moral custodians have been so relatively silent, its almost deafening.

Nigeria is now blatantly morally corrupt with pastors seeing nothing wrong with accepting private jets as gifts, in a country where more than 70% of population live on less than a dollar a day.

Therefore drastic changes are needed in our psyche, and the solution in its

4 parts must be organised by a Nigerian people united for change. This must be led by the most effective, amalgamating, inclusive, transparent and strategic group of all those groups agitating for change.

Definition: What are Morals?

Morals are the accepted good code of behaviour in a given society, both

the written and unwritten ones, that are believed to give favourable results, both individually and collectively (Bernard G, 2012) The Stanford Encyclopedia of Philosophy .

There are global morals, and then each region and local has their own morals, which usually are influenced by mix of culture with a people. The morals of a community, region or country are greatly influenced by culture, which is in-turn influenced by religion. Both the culture and religion of a people rely upon celebrities to engrave the morals into a peoples psyche.

The Oxford advanced learners dictionary, defines Morality as: that which concerns principles of right and wrong behaviour.

The Oxford definition, suggests there are constituent principles that form our collective morals, or in this case Nigeria's collective morals. These principles as mentioned before come from the culture, global morals, religion and the character of the person used as role models to dispense these morals into societal sub-consciousness.

Who are the moral custodians?

The Nigerian moral custody lies in all leaders in all segment of society in the following descending order of importance:

1. Religious leaders - Priest, Pastors, Imams and Indigenous shrine priests
2. Cultural leaders (Kings/Oba's and their chief's)
3. Government leaders - President/head of state,
Ministers,legislators,Judges Governors and Police Officers.
4. Civil Society leaders - Business captains of industry and their executives

1. as well NGO leadership. The media fall under this class of custodians and are key to a vibrant morally upright society.
2. Teachers - including lecturers
3. Parents

Importance of Religious moral custodians

The religious leaders are the most important of all 6 types of custodians because they are the only custodians that can reach the Nigerian collective conscience. The conscience of a people is formed by their morals, as directly influenced by where they worship and the

understanding of the principles taught in the doctrine. Hence, only the religious leaders can indulge Nigerians to labour to keep alight the celestial fire called "conscience" as referred to by George Washington.

"Labour to keep alive in your breast that little spark of celestial fire called conscience." ~ George Washington.

It must be said that generally speaking globally there is moral decay, however in no other country is it more obvious and dangerous, than in Nigeria, especially as there are plenty of religious institutions somehow impacting the community but still getting mixed results due to perversion of opportunists as outlined in First Annual Round Table Conference on Cultural Orientation

National Institute for Cultural Orientation (NICO, 2004)

How have our moral values been eroded?

Since the late 1970's our moral values have been steadily declining

unchecked by all moral custodians; especially the Religious moral custodians.

In an article for CHANGE entitled "The failure of Nigerian Religious

Institutions" he details how despite our strong rooted religious values, our societal values do not mirror the religion we espouse, at least compared to a country like Japan. He goes into detail, of how we are all complicit:

“Both religions have similar core value attributes and sanctions against indiscipline, oppression, wickedness and corruption. What is wrong with the conscience implanted by our creator in steering our basic daily activities, either private or public?

He says: Let's not take it far. You and I make up the two religions. How often do we obey traffic rules? Do we dump refuse in the gutters during rainfall? How often do we litter the streets with sachet? How often do we discharge our civilian duties without supervision? How often do we do the right thing at work? Diligence? How good does our integrity smell?”

His questioning of our obedience to traffic regulations is 100% accurate, as this is the junction where all 6 moral custodians display our character, and the content of our conscience. I have travelled to many countries, and most people who have done the same, will agree that the driving habits of each country's busy city, relatively depicts the character of the people in that city. This article written in 2011 sheds some light on the Matters of the moment from Nigeria Nov. 2011 ([Link in reference bottom](#))

Timeline of erosion of our moral fabric and the complicit quiet Religious leaders

Let us Chronologically examine some milestone corrupt events that have occurred since late 70's and under the watch of Government leaders, and the corresponding response from Religious leaders if any?

Shagari administration

The Shagari administration was notorious for corruption, especially with the value of the Naira being almost exactly equivalent to the US dollar. The cronyism, and banal waste of natural resources was mind blowing, contracts awarded indiscriminately. However the media were still following correct reporting standards. And documented most of the corruption without fear or favour.

In the Shagari era, one of the most reported corruption saga, that really lowered the moral bar, and seared our moral conscience was the Umaru Dikko cargo corruption case : this case as reported: Umaru Dikko affair and plunging Nigeria corruption. []

Through out this period we did not hear a word from the religious custodians at a significant pitch to affect the nations psyche.

Then there was a reprieve with the military coup of General Buhari, and arguably his more effective lieutenant late Brigadier Tunde Idiagbon - with the very strict regiment that saw the introduction of War Against Indiscipline (WAI). This regime was so effective, arguably more infrastructure was built in Nigeria in its 20 month span, than ever before, since independence.

The WAI effectively implemented by the Buhari's regime was not well liked by the corrupt elite of the people, and there was an audible sigh of relief if not jubilation when General Babangida along with his deputy Sanni Abacha overthrew them in a coup.

IBB appease military

General Babangida (IBB) also known as the evil genius, has been infamously called one of the most intelligent leaders of Nigeria, due to his shrewd way of manipulating and corrupting a people arguably willing to be corrupted.

Through out this period we did not hear a word from the religious custodians at a significant pitch to affect the nations psyche.

SAP IBB must go protests

IBB's corruption reached fever pitch and caused a revolt amongst the masses, when in 1989 it was alleged that Ebony magazine published IBB as the richest general in the world, This triggered spontaneous protests across the country's teeming student population, started by University of Benin, in a nationwide protest entitled "IBB must go" This lasted for 3 days, but IBB once again outwitted the collective will of the students and workers who

weren't sure whether to continue strike or not. At the time Babangida was notorious for giving luxury cars and other gifts to the military and other loyalists that he wanted to use for leverage. An infamous quote allegedly attributed to him is ~ Everyman has a price.

During the IBB era, a big blow was also done to moral custody when the Journalist Dele Giwa was letter bombed. There was much uproar from the populace, but much ado.

Another crazy episode during the IBB era was the election of Abiola for president and the sudden annulling of the election by IBB.

Through out this period we did not hear a word from the religious custodians at a significant pitch to affect the nations psyche.

Then there was a quiet coup, which almost looked like an agreement for Sanni Abacha to become head of state, Sanni Abacha was exactly IBB, but without the *sauf* or panache of leadership, he was a brute, and Nigerians suffered a great deal under him. So much so, the international community classified Nigeria as a pariah state.

Irony of Archbishop Benson Idahosa

At about this time, one of the fore-fathers of Pentecostal Christianity in Nigeria - The Late archbishop Benson Idahosa, had grown in popularity, influence and sagacity to be one of the first moral custodians to rebuke a sitting ruler as he rebuked a fearsome General Sanni Abacha in his government house.

Now this is supposed to be a good development and exactly the gumption we expect the religious custodians to have. However

considering that he was the mentor of most of the mega-church pastors today, who are not whispering talk-less of berating government leaders; it makes us wonder why they didn't learn that part of what he apparently taught them well.

The irony of Archbishop Idahosa was he was the pioneer of prosperity Christianity, as we watched him grow in congregation size with the following under his wing....

Private jet owning Pastor Ayo Oritsejafor, Pastor Chris Oyakhilome and yes the richest of them all Pastor David Oyedepo!

After Abacha died as rumoured while with an Indian prostitute, then the interim military government of Abdulsalami presided over an election that saw former head of state Obasanjo, come back to power for 8 years as a democratic president.

He himself being a self-acclaimed born-again christian, just gave the moral custodians a good reason to hands off trying to correct him, even though corruption continued unabated under his watch. Then there was the election of late Yar adua for the short time he lived as president until his untimely death due to illness. ,

Then Goodluck Ebele Jonathan (GEJ) succeeded him as acting president, until elected president. Under GEJ the subsidy protest on January 6th this year 2012 has been the most significant, and of note is that despite the intensity of this public protest about the increase of fuel prices that will undoubtedly cause hardship, I counted only 3 Church leaders who spoke publicly against the subsidy removal, including the Rev. Peter Akinola.

The silence from the church and mosque leaders is almost deafening. A few months ago the Taraba state gov. unfortunately crashed his private jet, with 5 people on board. The news reports stated just 5 years ago he was

a pharmacist, and owned just one car, but now he also has two helicopters and a private landing strip near his village.

Once again, we do not hear a word from the religious custodians at a significant pitch to affect the nations psyche. Instead we hear that Christian Association of Nigeria (CAN) President was gifted with a private jet for 40 years of service by his congregation.

A congregation that is part of the nations population where collectively 70% survive on less than a dollar a day.

Solution An awakening of d people to rebuke our moral custodians for

dereliction of duty, because we know d instructive scriptures they read from too.

- A. This will involve peaceful revolt & rejecting by members!
- B. A robust national conversation by signatory religious organisations to provide moral compass to combat deadly 7 sins
- C. A commitment by media organisations to name & shame moral bankrupt Nigerians & glorify moral role models based on morally sound conduct.
- D. A national peaceful protest by Civil Society calling clarity when it comes to separation of church & state.

Conclusion The Nigerian moral code has been gradually eroded for the last 30 plus years. It is now blatantly morally corrupt with pastors seeing nothing wrong with accepting private jets as gifts, in a country where more than 70% of population live on less than a dollar a day.

Therefore Drastic changes are needed in our psyche, and the solution in its 4 parts must be organised by a united Nigeria people united for change. Led by the most effective, inclusive, transparent and strategic group of all those groups agitating for change.

 Temidayo Ahanmisi

Temidayo Ahanmisi I'd have agreed with you but you subjugated culture to religion. That's where the chaos stems from. Most won't agree on this point...and that's why we'll always go round in a circle. It's not religion that builds strong societies. It is culture. Religion is political culture & philosophy.

Greg Ekhatore

Greg Ekhatore Through d media r societal consciouness most impacted, consider subtle but all powerful advertising campaigns of multinationals. For sure if coca cola & guinness r not using a grand structure, then the phrase has lost meaning??

They use celebrities. Beckham is a footballer but frames consciousness beoyond football.

Greg Ekhatior

Greg Ekhatior Of course appealing, hence i used d word "Influence"

I wonder why u mention impose, because morals values work best through understanding of longterm gains

The point for the coke analogy, was to drive home, how celebrities are used to drive in ur words a "grand structure" .
